Priority

# Shift to Fifth: Accelerate Your Manufacturing with Priority ERP

Outgrown spreadsheets or basic accounting tools

Business Complexity: multi-site, multi-warehouse, international

Need to integrate new tech: IoT, cloud, mobile

Compliance and traceability requirements increasing

You have an older ERP system that is going EOL or End of Support (MS NAV, SAP Business One 10.0, Various Sage products) and you require a new implementation?

# More of the Same isn’t Working Why you Might Need a New ERP System

All of these and other reasons are cause to consider implanting **a robust and flexible ERP system** that meets the needs of a growing company and can adapt to changing market dynamics over time

Priority

# Common Pain Points Solved by an ERP

- Disconnected systems and manual processes
- Inaccurate inventory and stockouts
- Lack of real-time visibility into operations
- Traceability challenges
- Inefficient planning and forecasting
- Difficulty scaling operations
- Compliance and audit risks
- Slow, inaccurate financial reporting

Priority

## These challenges can really slow you down…

# Its time to take off and accelerate!

# You Need an ERP Designed with Manufacturers in Mind

- ✓ Integrated MRP, WMS, delivery
- ✓ Full traceability from raw material to product
- ✓ Shop floor control: Visual production planning and capacity control
- ✓ Multi-level BOMs and work order status
- ✓ Quality control workflows and serial tracking

## Optimize manufacturing performance at every stage of the manufacturing process

# What Priority Brings to the Table

Cloud deployment

End-to-end visibility across departments

Real-time dashboards and insights

Rapid deployment, lower TCO

Modular design for scalable growth

## Real Benefits for Manufacturers

- ✓ Reduce production costs with data-driven decisions
- ✓ Improve delivery times through accurate scheduling
- ✓ Ensure compliance with built-in traceability
- ✓ Increase productivity via workflow automation
- ✓ Respond faster to supply chain changes
- ✓ Automation and AI: boost efficiency and reduce manual work
- ✓ Analytics and reporting – make data driven decisions

# How Priority ERP Accelerates Your Business

**Ease of Use:** intuitive interface, fast implementation

**Flexibility:** adaptable without heavy customization projects

**Real-Time Data & Insights:** make decisions based on up-to-date figures

**Cloud-Native,** but also available on-premise

**Openness:** multi-layered connectivity, featuring embedded integrations, ready-to-use connectors, and APIs.

**Robust Functionality:** end-to-end comprehensive platform

Priority

# Rich ERP Functionality

## Broad Set of Functionalities Addressing Critical Business Needs

- Finance
- MRP
- CRM & Sales
- Engineering
- Fixed Assets
- Business Intelligence
- Inventory Management
- Service (Field/Customer)
- Warehouse Management System
- MRP & Purchase Planning
- Supply Chain Management
- Business Process Mgmt.
- Mobile ERP
- Manufacturing
- Multi-company
- Equipment Rental
- Portal Generator
- Project Management

# Openness

## Embedded integrations

PLAID · SHIPENGINE · PayMe · FINASTRA · FIBI · Companyweb · NiceLabel · leumi · Avalara

## Ready-to-use connectors

Shopfloor Online · Planit · Power BI · WOOCOMMERCE · salesforce · PayEm · DOKKA Accounting Automation · monday.com · GAV T · commbox · shopify · Expensify · Magento · TheBeeCRM Smart Management

## Priority's Developer tools

REST APIs · ODBC · Web SDK · Webhooks

# Gevasol Case Study

"For me as a plant manager, it's all about being in control and feels very natural for me to work with Priority. We are operating in a very quickly changing environment. Priority clearly is a system that is intuitive and has the ability to change with us."

Michael Smits, Plant Manager at Gevasol B.V.

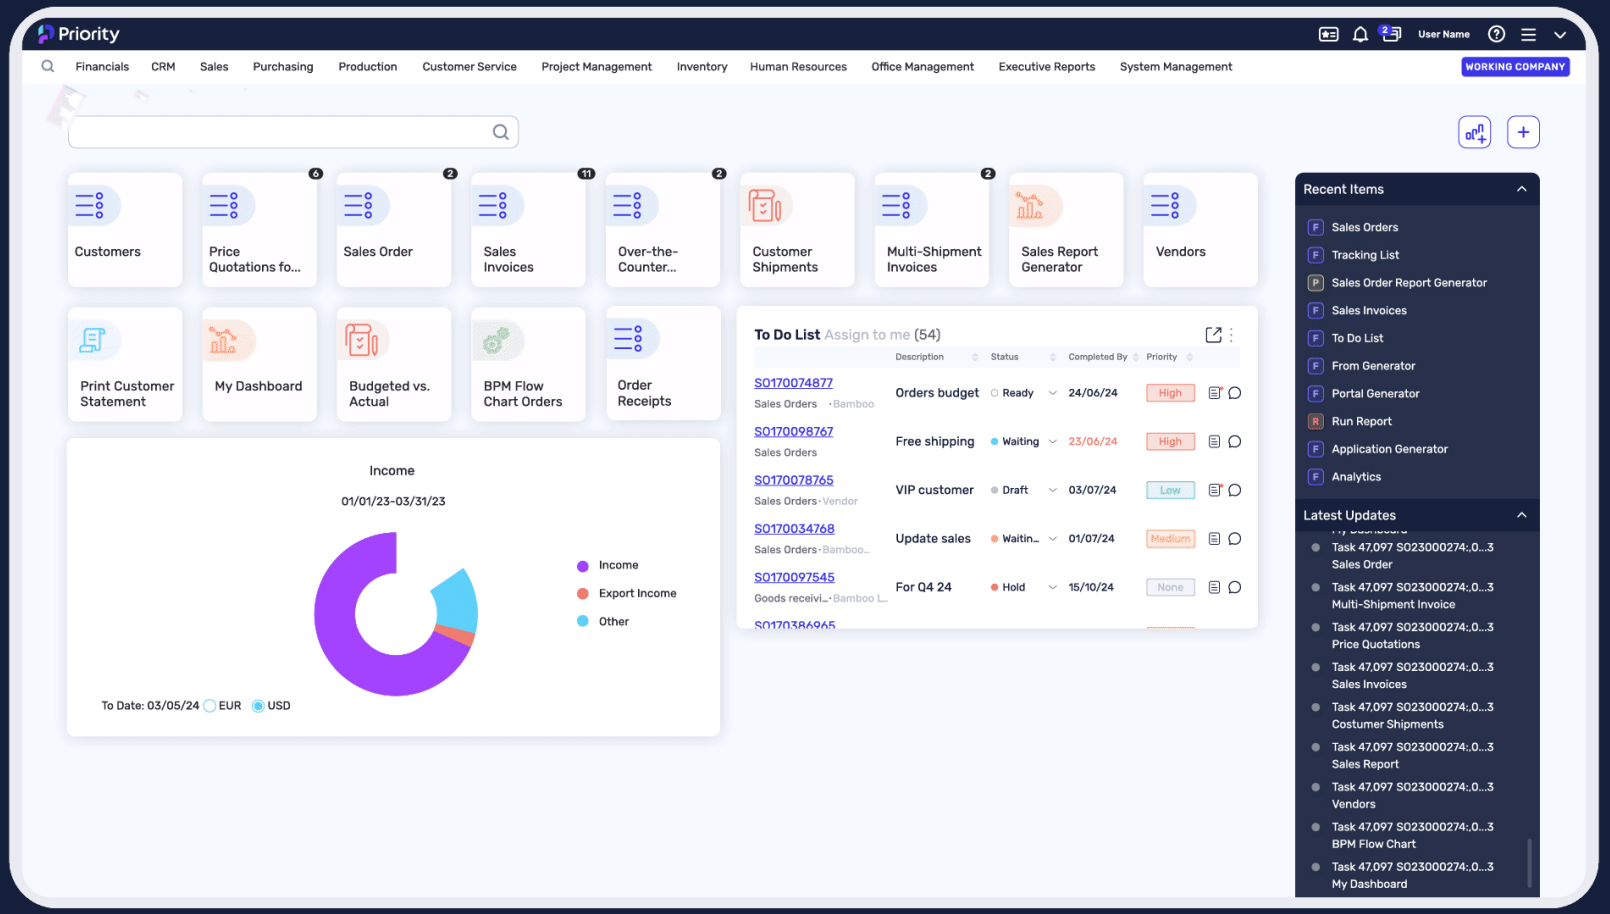
# Priority ERP Tour



# Real ROI

20%

overall manufacturing time saved

"With Priority's strong BI and management dashboard, we can view our entire operations in real time."

Nadav Razon, CEO of Solara

20%

overall efficiency increased

"Priority has proven to be a true, cost-effective solution with an affordable total cost of ownership in a very short time. We've increased our overall efficiency by 20%, and that's an impressive figure in our pharma industry."

Pauline Roberts, Business Director at RMC

50%

increase in processing of daily orders

"With Priority, we went from processing 10,000 order lines a day during our peak sales period, to 15,000 a day."

Sam Morgan, Operations Manager at Hillier
